

PODUGU BALA VEERA VENKATA SUNIL

Security & AI Engineer | VAPT · SOC & Blue Team · Applied GenAI

bvvsedu@gmail.com | linkedin.com/in/bala-veera-venkata-sunil-podugu | github.com/MBS-23 | Tanuku, Andhra Pradesh, India

PROFESSIONAL SUMMARY

Final-year B.Tech student in AI & Machine Learning (2026, CGPA 8/10, zero backlogs) with seven internships across offensive security and applied AI. Ran live web-application penetration tests on client systems, built real-time SOC detection and alerting on Splunk and Microsoft Sentinel, and shipped OmniAI Cloud — a multi-modal GenAI platform whose model fusion raised detection accuracy to 95%, published at an IEEE/IIIC international conference. CEH V13-trained and Oracle-certified; I build AI systems and secure them.

TECHNICAL SKILLS

Offensive Security: VAPT, Web Application Penetration Testing, OWASP Top 10, Burp Suite, PortSwigger Academy, Nmap, Metasploit, Wireshark, Kali Linux, DVWA/Mutillidae, API Security Testing, OSINT (Shodan, Maltego)

SOC, Blue Team & DFIR: Splunk, Microsoft Sentinel (KQL, analytics rules, playbooks), Wazuh, Snort, Sysmon, YARA, MISP, Threat Hunting, Log Analysis, FTK Imager, Autopsy, Cellebrite

AI & GenAI: Python, PyTorch, Hugging Face Transformers, LLMs, Prompt Engineering, RAG, YOLOv8/v11, ResNet50, CNN/RNN, BLIP, PaddleOCR, NLLB-200, FLAN-T5, spaCy, OpenCV

Development & Platforms: Python, C, JavaScript, PHP, SQL, HTML/CSS, FastAPI, Flask, Django, Streamlit, PyQt6, REST APIs, MySQL, MongoDB, DSA, OOP, Secure Code Review, Git, Azure, Oracle Cloud, Linux, XAMPP, Power BI

EXPERIENCE

Cybersecurity Analyst Intern (Paid) — Skills Uprise Spectranox Pvt Ltd Feb 2026 – Aug 2026

- Ran live penetration tests on client web applications (client names withheld); reported findings and drove remediation with their development teams.
- Built real-time SOC dashboards over DVWA and Mutillidae with live email alerting, turning lab exploitation into observable, actionable detections.
- Designed 12+ hands-on bug-hunting labs and trained 50+ students in secure versus insecure development (HTML, CSS, JS, PHP, SQL, XAMPP).

Cybersecurity Intern — VAPT, then Advanced Application Security — Supraja Technologies May 2025 – 2026

- Completed a full offensive-security curriculum hands-on — recon, scanning, enumeration, exploitation, phishing, malware and forensics — on Kali, Metasploitable 2 and Windows targets.
- Tested DVWA and live targets across the OWASP Top 10 (SQLi, HTML/iframe injection, LFI); found a real-world broken-link-hijacking vulnerability during OSINT work.
- Advanced track: Burp Suite, PortSwigger Academy labs, API security testing and a Splunk-based Log IDS/IPS build. Top performer of ~120; received LORs for placement and higher studies.

GenAI Intern — Huebits Tech Pvt. Ltd. Jan 2026 – Mar 2026

- Built and deployed OmniAI Cloud, a multi-modal AI platform (FastAPI + Streamlit on Azure) routing image, document and text inputs across nine pretrained models.
- Designed the Auto-Selector routing agent and the explainability layer that reports why each model was selected; the work was published as a conference paper.

Cyber Security Police Intern — Amroha Police (Government) Jun 2026

- OSINT and cybercrime investigation, digital forensics (Autopsy, Cellebrite, Oxygen Forensics), Wazuh SOC operations, bug hunting (IDOR, price tampering, OTP bypass) and crypto forensics on real cases.

Earlier AI internships May 2024 – 2026

- Cothon Solutions** (AICTE-approved, AI/ML): delivered the Legal Contract Analyzer; received a reference letter. **AIMER Society × APSCE** (120 hrs): five AI mini-projects — VQA, Power BI, YOLOv8 — plus a follow-on YOLOv11 use case.

KEY PROJECTS

OmniAI Cloud — Multi-Modal AI with Automatic Model Selection & Explainability | Python, FastAPI, Streamlit, PyTorch, ResNet50, YOLOv8, BLIP, PaddleOCR, NLLB-200, Azure

- Fused ResNet50 with YOLOv8 to correct generic COCO labels, raising species-detection accuracy from a 68–85% single-model baseline to **95%**; startup pre-initialisation cut first-request latency from ~86s to ~1.8s.
- Conditional routing removed up to **76%** of unnecessary model execution. Published at the International Conference on Cyber and AI Security (MITS × IIIC × IEEE).

ShadowPortX — Offensive & Defensive Port Scanner | Python, PyQt6, multithreading, PyInstaller

- GUI-first alternative to Nmap/Zenmap: TCP, UDP, Stealth (SYN) and Version scans with built-in WHOIS/DNS intelligence, a multithreaded engine and one-click PDF/CSV/JSON reporting.

Log-Based IDS/IPS Prevention System | Python, Splunk, SIEM correlation

Real-time log ingestion, detection rules, risk scoring and alerting — a working detection-and-response workflow rather than a dashboard alone.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning — SASI Institute of Technology and Engineering (JNTU-affiliated) 2022 – 2026 | CGPA 8/10

Intermediate (MPC), Narayana Junior College — 814/1000 · SSC, Bhashyam Public School — 588/600 2020 – 2022 | 2019 – 2020

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate & Oracle AI Vector Search Certified Professional** — both valid to October 2027.
- CEH V13 track** — six-month Ethical Hacking & Cybersecurity specialisation (Skills Uprise); **SOC with AI L2/L3** — CyberGuide Telugu (Splunk, Sentinel, YARA, MISP, DFIR).
- Selected into the **TryHackMe AI Security L1** track (premium voucher); Certificate of Excellence, Supraja Technologies. Authored the class-wide DAA notes.
